

# BULL PALLET RACKING PROTECTORS – with Guide Rollers

Pallet racking protectors which include rollers to facilitate pallet placement to and from floor level locations. The incorporation of rollers helps to dampen shock and vibration which can occur when pallets are being located. They are most suitable for use in warehouses, distribution depots, manufacturing units etc.

**Specifications:**

Material: Steel

Roller material: Polyamid

Roller Dimensions:

110mm High

75mm from bottom edge of roller to floor.

Variants:

Right-angle and 'U' profiles.

Finish:

Indoor use: Powder coated yellow with black stripes.

- For Indoor use
- Highly visible colours
- Easily installed
- Virtually indestructible
- Guide roller(s) incorporated
