

CONE ROPE WITH BREAK POINTS – HIGH VISIBILITY

PRODUCT INFORMATION

SUMMARY

A modular rope system that has break points approximately every 4.5 metres with a total length of ~18 metres (**4 lengths in each pack**). The unique, custom snap together connectors are designed to disconnect under excessive load. Multiple sections can be connected to create longer rope lengths as required.

FEATURES & BENEFITS

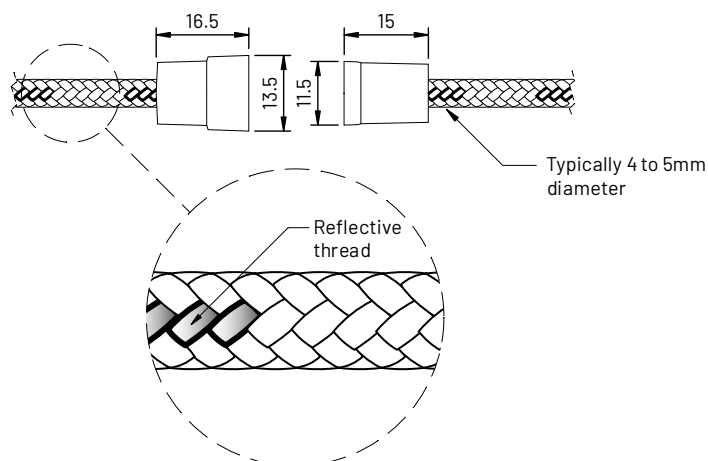

- Unique snap together connectors, designed to disconnect under excessive load.
- Bright orange, high visibility rope colour, with reflective strands woven throughout the length.
- Connectors manufactured in a high visibility yellow colour.
- Each pack comes in four segments, preconnected for quick unbundling and use.
- Resealable and reusable packaging for tidy and sealed storage between jobs.

COMMON APPLICATIONS*

- Marking boundaries between road cones.
- Setting out areas in, or off limits.
- Other general purpose marking applications where high visibility or custom lengths without cutting is required.

*The suitability of this product for a particular application must be assessed based on the site, conditions and intended use.

TECHNICAL, DRAWINGS AND SPECIFICATION

Note: All dimensions are in mm

CONE ROPE WITH BREAK POINTS – HIGH VISIBILITY

TECHNICAL, DRAWINGS AND SPECIFICATION

Pack	Total rope length per pack	Approximately 18 metres
	Rope segment length	Approximately 4.5 metres
	Number of segments per pack	4
	Number of connectors per pack	4 pairs
	Package style	Pre-connected, single bundle
	Weight per pack	Typically 170g
Rope	Material	Polyester outer
	Colour	Bright orange with reflective threads
	Diameter	Approximately 4.8mm
Connectors	Material	Polypropylene
	Colour	Bright Yellow

USER GUIDE

1. The rope is supplied pre-connected into a single bundle (total length is approximately 18m) for quick deployment.
2. Remove from packaging. Check that the connectors are free to disconnect and are not tangled.
3. Become familiar with the force required to connect the sections together and to break them apart. Assess if this is suitable for your application.
4. Add or disconnect segments to make the required length for your application.

Tips

Coil into a single loop after use; Reuse the click-seal packaging this product comes in for tidy, compact storage without tangling.
