

The Road Plate 15/5 is the ideal substitution to steel plate systems, providing more flexibility, quicker installation and added security.

- Tested to vehicle weight of 44 tonnes
- Easy 'two man lift' installation – no expensive equipment required
- The innovative flexible edge dampens any unwanted sounds making the product ideal for use in residential areas
- Anti-slip surface
- New drop pin feature to increase stability
- Compliant with Safe Working Practise
- Each road plate is fitted with heavy-duty linking brackets that lock easily and securely together
- Locked securely into position using bolted end sections (we recommend an M16 bolt suitable for concrete or tarmac)
- Single wheel load: 6000kg at 700mm trench width
- Ramp design helps slow down traffic for increased safety
- Refurbishment service available

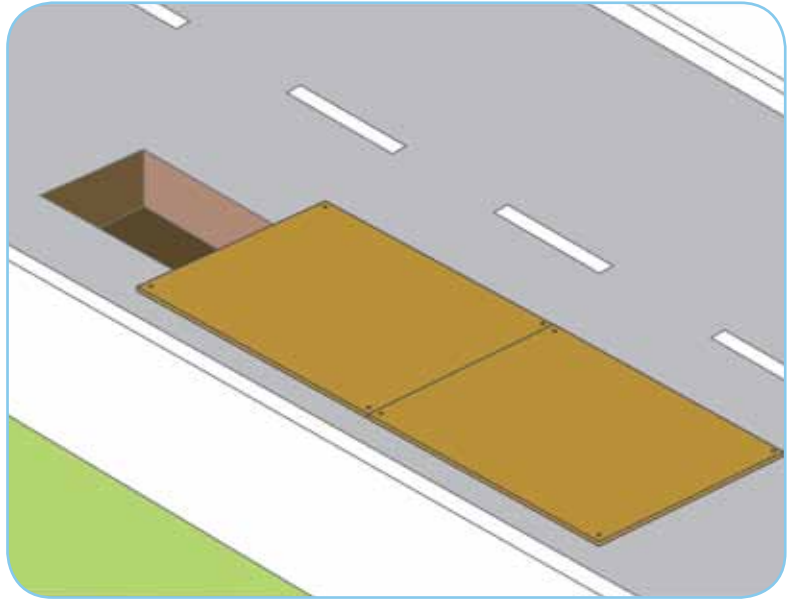

For further information, please see our website

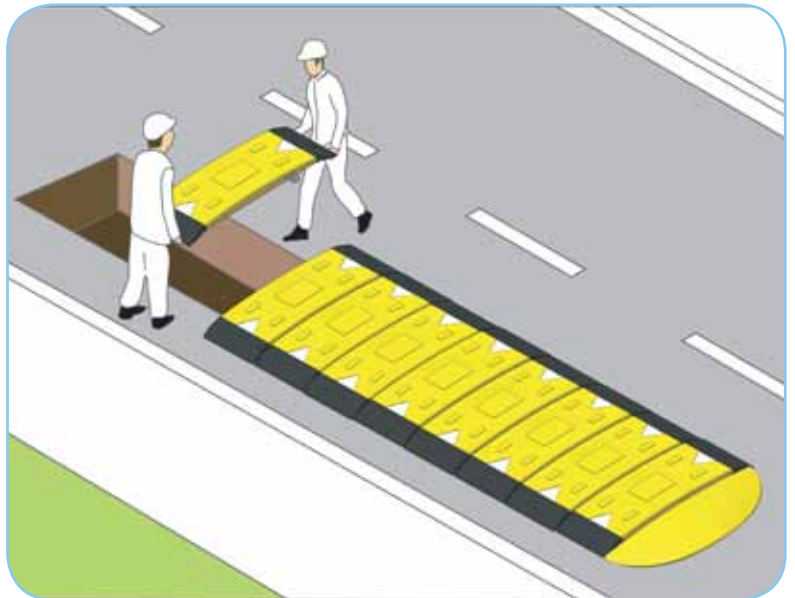

Steel Plates:

Heavy and difficult to manoeuvre – special lifting equipment required.

Road Plate15/5:

Light, 2 man lift to deploy. Easy to store and transport. Robust and long lasting, polymer material does not rust or degrade.
