

INDUSTRY AND WORKPLACE MIRRORS

MIRRORS FOR TOUGH INDUSTRIAL CONDITIONS

VIALUX® has created a range of mirrors in stainless steel (both lens and frames) adapted for industrial sites where extreme heat may be an issue or in the food production industry. Without frames or joints, the mirrors are easy to clean and will not rust.

STAINLESS STEEL OPTICS

Stainless steel optics are unbreakable, insensitive to UV, durable and guarantee a long life span. The high grade stainless steel and the precision of its polishing ensures a high image quality.

2 DIRECTIONS

A convexity offering a 90° angle of vision, used at junctions where users are approaching from 2 different directions.
