

VIATEC: Viasealant Aerosol

Joint Edge Sealer

Directions for use:

Hold can tightly and shake vigorously for at least 30 seconds after the ball has dropped before use.

Spray along vertical edge of prepared excavation, cover the edge to be sealed with long strokes from a distance of 200-300mm working from the top of edge downwards making sure to cover entire surface.

Fill excavation with desired material compact and repeat above process.

Cleaning:

After spraying Edge sealer hold can upwards immediately after use and **spray for a second**, take care not to spray into wind, this will clear bitumen from spray valve. Failure to clean spray valve could result in the aerosol becoming blocked rendering the can unusable.

Caution:

Pressurised container. Protect from sunlight.

Do not expose to temperatures exceeding 50°C.

Do not puncture or incinerate even when can is empty.

Do not spray onto naked flames or any incandescent material.
