Ground Protection Solutions

# ECONOMAT™ PLUS

Medium duty ground protection mat with hand holds

High quality, re-usable Trakmat

# ECONOMAT™ PLUS

- 100% Recycled Low Density Polyethylene (LPDE)
- Lightweight, weighing just 32kg
- Support loads up to 30 tons\*
- Hand holds for easy manoeuvrability
- Connection points at each corner of the mat
- Man-deployable
- Smooth micro-traction surface on the reverse
- Moulds to uneven or undulating ground conditions due to its flexibility

EconoMat™ Plus has been specifically developed as an efficient alternative to traditional builders plywood providing a low cost, easy to deploy, reusable product for a wide range of uses within the construction, groundwork and events industries. Combatting the risk of slippage or falls, injury from splinters, delamination causing short lifespan, the increasing cost of plywood and environmental costs of its disposal. EconoMat™ Plus provides a safer, more economical and environmentally friendly alternative, that is sustainable, can be recycled and is REACH compliant.

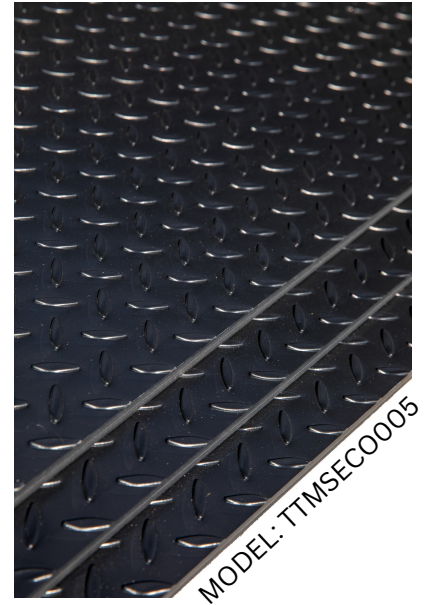

EconoMat™ Plus can be used as a tough multi-use construction board and temporary access mat for mixing cement, storing soil, creating construction walkways or protective platforms and more. Made in the UK from 100% recycled low density polyethylene (LDPE), EconoMat™ Plus provides considerable long term advantages over plywood, metal and stone. Being weatherproof, flexible, less prone to breakage or splintering and supplied with a traction surface for both personnel and vehicular movement, EconoMat™ Plus delivers enhanced performance, health and safety benefits and substantial long term cost savings.

At just 32kg, EconoMat™ Plus is easy to handle and is man-deployable. If it is used for temporary access or ground protection there is a range of connection options to create access routes or walkways, working pads, storage depot areas or event flooring.

# PRODUCT OVERVIEW

EconoMat™ Plus has a chequer plate finish with an intended use of ground protection which provides high-grip and anti slip surface. EconoMat™ Plus has a load capacity of up to 30 tons\* and is lightweight, flexible and weather resistant. EconoMat™ Plus is ideal for use in construction, landscaping, maintenance, utilities and events industries.

- Material: 100% Recycled Low Density Polyethylene
- 2410 mm x 1200 mm x 14 mm
- Weight 32kg
- Load bearing capacity 30 tons\*
- Multi-bar chequer plate surface for maximum traction
- 3 hand holds
- Long life expectancy
- Maintenance free
- Non-toxic
- Slip resistant
