Code:
EVO-R3840/TP

Description:
Evo Recycled® 38cm x 40m Absorbent Roll Twinpack - Poly Pack

Absorbency / Capacity:
196 litres

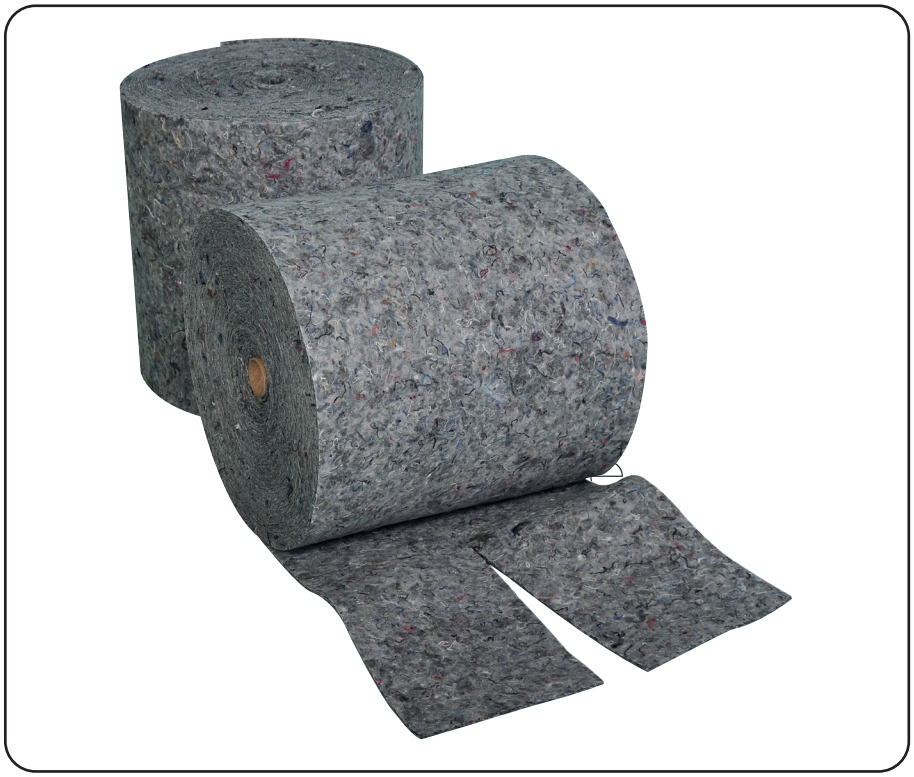
Dimensions:
38 x 40m

Application:
General Purpose

Quantity:
2

Weight - Kg:
5

Ean:
0640516606985



Evo Recycled® 38cm x 40m Absorbent Roll Twinpack - Poly Pack

Evo Recycled® Triple-loft oil preferential absorbent roll. Manufactured in Britain, EVO Recycled® redefines safety within the spill control industry. It stands as the only absorbent matting in the UK tested to BS 4790 fire retardancy standards, ensuring unparalleled safety in environments prone to fire hazards. EVO Recycled® also exceeds BS 1425 standards for material cleanliness and absorbs an average 25% more than comparable PP absorbents, cementing its position as the pinnacle of safety and quality in British Spill Control.

The unique EVO rolls are super absorbent cotton fibre material made in the UK from recycled natural fibres, reducing your use of non-sustainable products. Weight for weight, EVO rolls are the most oil absorbent in Europe with the lowest carbon footprint. Tough and soft, the pads have a high loft construction for maximum usability and a low linting construction for bench top use.
Absorbs over 25% more than standard polypropylene rolls. Outstanding oil retention properties; oil stays in the material during clean-up, reducing floor contamination and the need for secondary cleaning. Ultra-low carbon footprint, high performance and environmentally friendly. For use on oil leaks and spills in the workplace for quick and efficient clean-up.

Suitable for use with:
- Coolant
- Antifreeze
- Oil
- Water
- Weak chemicals
- Solvents

EVO spill products provide a unique solution for companies pursuing higher ethical and environmental standards without compromising performance and value.
- Each product in the range is manufactured from recycled or sustainable material
- All EVO products are manufactured in Britain with a far smaller carbon footprint than the vast majority of Spill Control products produced overseas
- EVO poly-pack & box packaging is recyclable

E & OE. 1-25. BS4790 and BS1425 information only applies to Evo Recycled® pads and rolls. Other parts are not yet tested to these standards. EVO Recycled® absorbents will not counteract flammable properties of any liquid absorbed into the material. If a spill or leak occurs, act according to your existing fire safety procedures.
