Evo Recycled® Flame Retardant Absorbent Wood Fibre - 15 Litre Dispenser Box

Evo Recycled® Recycled, flame retardant wood fibre offers a quick and effective response to any spillage and reacts immediately. Tested to British Standard flammability requirements of BS5852 Pt2 1982. It is an organic, recycled, non-abrasive, granular product made from wood fibre, which has been dried at high temperatures. It is a natural ecological absorbent with low environmental impact as it can be incinerated.

It can be widely used in all industries but is especially suitable for petrol stations, airports, cleaning companies, railway stations, emergency services and the military.

Supplied as a 15L box with cut-away area which enables it to be used as an absorbent drip pan.

- Leaves surfaces safe, clean and dry
- Enviro-friendly responsibly sourced recycled material
- Lightweight product to transport and use
- Fireproof
- Harmless to humans, animals and plants
