

Heavy-Duty Wheel Stop | 1000mm | Fixings Included

PRODUCT INFORMATION

SUMMARY

For areas with lots of parking HGVs, trucks and coaches, this extra heavy-duty wheel stop is a great way to prevent damage to infrastructure, fences and other vehicles. When placed at the back of a parking bay, this substantial **wheel stop** helps prevent drivers of large vehicles from overshooting the parking space.

FEATURES & BENEFITS

- **Easy Installation** - Can be installed easily with no specialist equipment. Requires no excavation, only a solid surface to bolt the wheel stop to.
- **Supplied With Fixings** - This wheel stop comes supplied complete with fixings, ensuring you have everything needed to install it.
- **Heavy Duty Construction** - The heavy-duty construction of this rubber wheel stop means it will stand up to years of use without degrading.
- **High Visibility Marking** - A vibrant yellow strip highlights the peak of the wheel stop, ensuring that pedestrians and drivers do not trip over the stop when walking through parking areas.
- **Eco-Friendly** - This stop is made from recycled rubber, meaning less landfill waste.
- **Suitable For HGVs** - The extra large and extra durable construction of this wheel stop makes it the perfect tool for stopping HGVs and coaches from overshooting bays at ferry ports, depots, and service stations.
- **Won't Damage Tyres** - As this stop is made from rubber, it is far less likely to cause damage to tyres than alternatives made from steel and concrete. All fixings are also recessed for added safety.
- **Cable & Drainage Recess** - The underside of the wheel stop features a cable recess that allows cabling to be safely run across the back of parking bays without the risk of it being run over.
