

P5-LMA

Manufactured to EN13236

DESCRIPTION:

The P5-LMA is a premium laser welded concrete blade that offers great performance on asphalt and abrasive materials. Deep draft segments protect the steel core when cutting deeper into asphalt and abrasive materials.

FEATURES:

- High quality diamonds
- Advanced metal bond
- Laser welded
- Deep draft segments for undercut protection.

MACHINE SUITABILITY:

Angle grinders, Wall chasers, Hand held saws, Table saws. Floor saws

STANDARDS:

- EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products.
- The Organization for the Safety of Abrasives (oSa): Members of oSa have to comply with strict manufacturing, quality and safety procedures in accordance with EN13236.

USER TIPS:

- Make certain the blade is suitable for the material before cutting.
- Guide the blade straight into the material
- Do not use unnecessary pressure, the weight of the machine is sufficient
- Carry out a slight forwards and backwards pendulum movement when cutting
- If cutting speed reduces you can re-sharpen (dress) diamond segments by making several cuts into a highly abrasive material such as a 3-Newton concrete or cinder (breeze) block.
