

## P4-4in1

Manufactured to EN13236

### DESCRIPTION:

The P4-4in1 blade is a fast cutting turbo diamond blade complete with cooling holes that enables use across a wide range of construction and building materials such as engineering brick, clay products, reinforced concrete, general purpose concrete products, York stone, concrete pavements, general facing bricks, hand-made bricks, concrete roof tiles and dense concrete blocks.

### FEATURES:

- Turbo rim
- Cooling holes

### MACHINE SUITABILITY:

Angle grinders and hand held saws.

### STANDARDS:

EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products.

### DIAMOND BLADE TIPS:

- Make certain the blade is suitable for the material before cutting
- Guide the blade straight into the material.
- Do not use unnecessary pressure, the weight of the machine is sufficient
- Carry out a slight forwards and backwards pendulum movement when cutting
- If cutting speed reduces you can re-sharpen (dress) diamond segments by making several passes into a highly abrasive material such as a 3-Newton concrete or cinder (breeze) block.
