

P4-CM

Manufactured to EN13236

DESCRIPTION:

Concentrating on the requirements of Civil, Utility and Groundworks contractors, makes the P4-CM ideal for a wide range of applications and reinstatement work. Its three segment types complement each other, offering equally good performance across a wide range of material applications, from asphalt to reinforced concrete and other popular construction materials. The P4-CM is a very versatile blade making it an ideal solution when materials change from job-to-job.

FEATURES:

- Laser welded
- Triple bond segment technology to allow use across a wide range of materials
- Deep draft segments for undercut protection.

STANDARDS:

- EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products
- The Organization for the Safety of Abrasives (oSa): Members of oSa have to comply with strict manufacturing, quality and safety procedures in accordance with EN13236.

DIAMOND BLADE TIPS:

- Make certain the blade is suitable for the material before cutting
- Guide the blade straight into the material
- Do not use unnecessary pressure, the weight of the machine is sufficient
- Carry out a slight forwards and backwards pendulum movement when cutting
- If cutting speed reduces you can re-sharpen (dress) diamond segments by making several passes into a highly abrasive material such as a 3-Newton concrete or cinder (breeze) block.

PART NO. DIMENSIONS

DP15570	300 x 3.0 x 12 x 20mm (12")
DP15572	350 x 3.2 x 12 x 20mm (14")
DP15573	350 x 3.2 x 12 x 25.4mm (14")
DP15576	450 x 4.0 x 12 x 25.4mm (18")

MACHINE SUITABILITY:

Hand held saws, table saws and floor saws.

PACKAGING DETAILS:

Full colour corrugated cardboard box.
