

P5-5in1

Manufactured to
EN13236

DESCRIPTION:

The P5-5in1 blade is renowned for its extremely fast cutting and ability to cut a wide range of materials from steel and Indian stone to reinforced concrete and building materials. Diameters 230, 300 & 350mm have a reinforced centre flange to increase strength when cutting harder materials, improving stability and providing straighter cuts. The 5in1 is the ideal choice for all levels of users and is equally at home on large construction sites or smaller jobs.

FEATURES:

- Turbo rim
- Cooling holes
- Reinforced centre flange (diameters 230, 300 & 350mm)

MACHINE SUITABILITY:

Angle grinders, wall chasers, hand held saws and table saws.

STANDARDS:

- EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products.
- ISO9001:2010 Quality Management System: Standard designed to help ensure organizations meet the needs of their customers.

DIAMOND BLADE TIPS:

- Make certain the blade is suitable for the material before cutting. Guide the blade straight into the material.
- Do not use unnecessary pressure, the weight of the machine is sufficient.
- Carry out a slight forwards and backwards pendulum movement when cutting
- If cutting speed reduces you can re-sharpen (dress) diamond segments by making several passes into a highly abrasive material such as a Newton concrete or cinder (breeze) block.
