

## P6-LBC

Manufactured to EN13236

UNIVERSAL CONCRETE

### DESCRIPTION:

The P6-LBC looping diamond blade is available in 350mm diameter with either 8mm or 10mm wide segments. They are primarily used on floor saw machines for cutting wide channels in concrete when preparing for the installation of traffic detector loop management systems. This is a sub-surface method of identifying the presence and speed of a vehicle at traffic lights and security barriers etc.

### FEATURES:

- High quality diamonds
- Advanced metal bond
- Laser welded

### MACHINE SUITABILITY:

Floor saws.

### STANDARDS:

- EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products.
- The Organization for the Safety of Abrasives (oSa): Members of oSa have to comply with strict manufacturing, quality and safety procedures in accordance with EN13236.

### USER TIPS:

- Make certain the blade is suitable for the material before cutting
- Guide the blade straight into the material
- Do not use unnecessary pressure, the weight of the machine is sufficient
- If cutting speed reduces you can re-sharpen (dress) diamond segments by making several passes into a highly abrasive material such as, a 3 Newton concrete or cinder (breeze) block.
