DESCRIPTION:

The P6-PT is a professional specification designed to cut effortlessly through porcelain and other hard tiles, including 20mm exterior paving. Sizes 150mm and above perform better when used wet.

DP16841 is suitable for use on hand held angle grinders.

MACHINE SUITABILITY:

- 115 and 125mm diameters: Angle grinders
- 180,250 & 350mm diameters: Tile and table saws.

STANDARDS:

EN13236: European Standard that regulates the safety requirements for super abrasive (diamond) products.

USER TIPS:

- Make certain the blade is suitable for the material before cutting
- Guide the blade straight into the material
- Do not use unnecessary pressure, the weight of the machine is sufficient
- If cutting speed reduces you can re-sharpen (dress) diamond segments by making several passes into a highly abrasive material such as, a 3-Newton concrete or cinder (breeze) block.
