

★ SOLID GEAR

DYNAMO GTX

ART. SG10226

Solid Gear Dynamo GTX is a unique combination of a shoe designed for trail as well as running. The complete ETPU midsole provides optimal comfort and rebound. The stability comes from the character of a trail shoe, with a special board construction for control of the flexing. The rubber outsole is developed to offer superior grip, and despite the lightweight of the outsole, it also contributes to the stability. Sock construction together with ripstop on the upper combined with BOA® Fit System and GORE-TEX® Stretch Technology gives a great feeling while maintaining excellent breathability and keeps the foot dry. Dynamo GTX uses the specially developed high rebound OrthoLite® insole mainly made of recycled materials. Stabilizing heel counter made with collected ocean waste such as fish nets. Antistatic, oil resistance and anti-slip are all features of the rubber outsole that enables the Solid Gear Dynamo GTX to be certified according to EN-20347:2012. ESD function according to EN IEC 61340-4-3:2018.

Complete ETPU midsole for endless cushioning
GORE-TEX® Stretch Technology
BOA® Fit System on collar construction
Highly breathable PU foam insole from OrthoLite®
Sock construction and lightweight CORDURA® ripstop upper
Upper: CORDURA® ripstop Lining: Stretch Membrane: GORE-TEX®
Outsole: Oil and slip resistant rubber
Midsole: ETPU Footbed: PU foam with highly breathable recycled materials
Function: BOA® Fit System Fit: Normal Sizes: 35-48
Safety standard: EN ISO 20347:2012 O2, SRC, WR, FO
