

PRODUCT INFORMATION

SUMMARY

The blow-moulded JSP 200 litre grit bin is a durable and highly visible grit bin suitable for a range of environments, from school car parks to factory footpaths. It can fit in 10 bags of grit, which is plenty enough to keep your site or car park frost-free for weeks at a time.

Thanks to the new blow-moulded construction, the bin is strong and has a better finish than previous rotary moulded models, making it perfect for areas where appearance is key. A choice of colours also allows this bin to be used for different applications, such as safe storage of spill equipment or safety gear.

SPECIFICATION

Dimensions	Height	710mm
	Width	850mm (Top) 710mm (Bottom)
	Depth	680mm
	Weight	13.2kg
	Capacity	200L or 250kg Grit Salt
