THROUGHBOLT FOR UNCRACKED CONCRETE

Zinc Plated throughbolt for uncracked concrete

FEATURES AND BENEFITS

High performance in non-cracked concrete confirmed by ETA Option 7.

Optimized cone shape, increasing the rake angle floor straps.

The new shape of the expansion band with an innovative ring at the end of the band ensures a perfect connection between the anchor and the ground.

Application specification in accordance with EAD 330232-01-0601-v01 and included in ETA-23/0887.

Identification mark of anchor length, facilitating control after installation.

Polish production guarantees the highest precision of workmanship and its repeatability.

Quick and comfortable assembly using an SDS punch.

Possibility of installation near the edge of concrete and at short distances from adjacent screws.

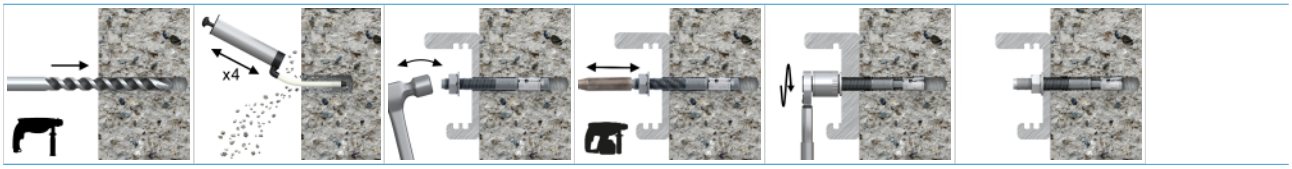
INSTALLATION GUIDE



1. Drill a hole of required diameter and depth.
2. Clear the hole of drilling dust and debris (using blowpump or equivalent method).
3. Lightly tap the anchor through the fixture into hole with hammer, until fixing depth is reached.
4. Insert bolt through fixture and tighten to the recommended torque.
