

PRODUCT INFORMATION

SUMMARY

The StreetWise range of flat top bollards brings easy maintenance and extreme durability to its apex. Unlike traditionally painted metal bollards, the StreetWise range of bollards is made from a thick “through coloured” Terrathane material cast around a steel core. This means that even if the surface is scratched, the plastic beneath is the same colour.

This unique design means that the StreetWise Flat Top bollards will not rust and require expensive painting and maintenance. The most they should ever need is washing with a wet cloth or pressure washer.

This highly durable outer shell is cast onto a steel core giving the bollard strength, whilst not compromising the resistance to weathering. Terrathane is a type of specialist Polyurethane unique to these bollards, it can withstand severe impacts without shattering.

DIMENSIONS

StreetWise 105	Height Above Ground	1050mm
	Height Total	1350mm
	Diameter	105mm
	Weight	3.0kg
StreetWise 130	Height Above Ground	1050mm
	Height Total	1350mm
	Diameter	260mm
	Weight	5.5kg
StreetWise 155	Height Above Ground	1050mm
	Height Total	1350mm
	Diameter	260mm
	Weight	8.0kg

MATERIAL	
Outer	"Terrathane" Polyurethane
Core	Steel
Colour	Black
Options	
Fixing Type	Root Fixing, Anti-Ram, Removable (socket)
Design	Flat Top, Dome Top
Reflective Banding Colour	Red, White, Red & White Split, Yellow, Blue
