

PRODUCT INFORMATION

SUMMARY

Wide based posts are an important part of any traffic scheme where sign lighting or traffic lights are being installed. The wide diameter of the lower portion of power posts means there is room for an inspection door; this is where cables can be hooked up and maintained.

Available in multiple diameters and lengths as well as optional bitumen or glass flake root coatings. In addition to standard lengths, all posts can be cut to any length required.

DIMENSIONS

| | | |
|------------|---------------------------|----------------------------|
| 76mm Shaft | Shaft Diameter | 76mm |
| | Base Diameter | 140mm |
| | Thickness | 3mm Base - 2.5mm Top Shaft |
| | Planting Depth < 5m Posts | 800mm |
| | Planting Depth > 5m Posts | 1000mm |
| 89mm Shaft | Shaft Diameter | 76mm |
| | Base Diameter | 140mm / 168mm |
| | Thickness | 3mm Base - 2.5mm Top Shaft |
| | Planting Depth | 1000mm |

| | | |
|-------------|----------------|----------------------------|
| 114mm Shaft | Shaft Diameter | 76mm |
| | Thickness | 3mm Base - 2.5mm Top Shaft |
| | Base Diameter | 140mm / 168mm |
| | Planting Depth | 1000mm |

MATERIAL

| | |
|---------------|-------------------------------|
| Materials | Galvanised Steel - S275 Grade |
| Root Coatings | Bitumen or Glass Flake |
