# RIDGEBACK™ SPEED RAMPS

## REFLECTIVE SPEED RAMP WITH A DISTINCTIVE DESIGN

The NEW Ridgeback™ Speed Ramp is designed to reduce vehicle speed and improve safety conditions in residential and commercial areas. The product's distinctive design and the angle of retro-reflective elements optimises interaction with vehicle headlamps to improve visibility. Conforms to performance requirements of BS EN 1436:2018 and durability requirements of BS EN1824:201.

# RIDGEBACK™ SPEED RAMPS

## ✓ INTERLOCKING

- Effective interlocking system for easy connectivity and maintains stability before and after assembly.

## ✓ REFLECTIVE

- Increased area of reflectivity compared to traditional styles of speed ramp.
- Innovative approach of using thermoplastic retro-reflective elements with glass beads for improved visibility.

## ✓ HOSE/CABLES CHANNEL

- Channel on the underside of end caps to accommodate cables safely through the speed ramp.
- Cables running through end caps complete the overall finish of the product and maintains cable stability.

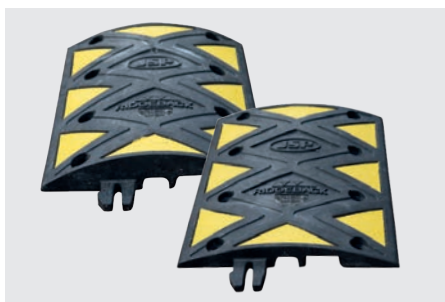

## ✓ DISTINCTIVE DESIGN

- Both speed ramps and end caps are symmetrical in design for ease of installation.
- Design optimises visibility for road users maximising performance.

## ✓ EFFECTIVE

- Designed to reduce vehicle speed, improving safety conditions in residential and commercial areas.

## ✓ RAMP OPTIONS

- 5cm – Aimed to reduce speed to a maximum of 10mph/16kph.
- 7.5cm – Aimed to reduce speed to a maximum of 5mph/8kph.

## ✓ EASY ASSEMBLY

- Easy to assemble with optional additional anchor points for improved stability.

### 10MPH & 5MPH RAMPS

10mph speed bump	H 5cm, L 50cm, W 40cm, 8.2kg		Qty 1
10mph End cap	H 5cm, L 50cm, W 20cm, 4.5kg		Qty 1
5mph speed bump	H 7.5cm, L 50cm, W 40cm, 16kg		Qty 1
5mph End cap	H 7.5cm, L 50cm, W 20cm, 9kg		Qty 1
