

TECHNICAL DATA SHEET

Product Name:	STARTMARK MULTI-PRIME
Coating Type:	Solvent based acrylic
Typical Uses:	A very quick curing primer for improving adhesion between concrete /worn asphalt and thermoplastic, Safemark MMA and Safemark S .B Acrylic line marking products.
Theoretical Coverage:	Up to 60 linear metres @ 100mm width line per litre. Typical 50 linear metres @ 100 mm width line per litre. 5/6 square metres per litre.
Drying Time at 20°C: (will vary with Temperature)	Touch Dry: 10 minutes
Colour:	Translucent
Packaging:	5 & 20 litre containers.
Shelf Life:	6 months under cover in good storage conditions.
Storage:	Can be stored for a period of 6 months in its original packaging if not opened. Avoid storing in hot, humid or low temperature conditions (freezing). Maximum temperature 35°.
Surface Preparation	Ensure that surface to be coated is dry and free from oil, dust, road salts and other contaminants before application.

Application to concrete:

Stir well and apply with a solvent resistant medium roller, brush or by airless spray. Allow to dry before applying Safemark Solvent based acrylic paint.
New porous concrete should be allowed to cure for one month prior to application.

Health & Safety:

Please see relevant MSDS sheet
