

Model: BRADLEY

Protection Class: S1P SRC ESD

Article: RV20144

EU Regulations: EN ISO 20345:2011

DESCRIPTION

The Bradley model, in S1P SRC ESD protection class, with breathable Nylon upper and anti-abrasion film on the toe cap, is a super light summer work footwear.

The innovative sole made with an extra light new generation PU compound, and the new anti-puncture system significantly reduce the overall weight of these lightweight safety shoes, while ensuring maximum grip and protection of the sole of the foot.

The AirToe Aluminium toe cap in turn contributes to the lightness of the shoe, making the Red Leve line the lightest safety shoes in the U-Power range.

Men's and women's work shoes with non-slip, abrasion-proof, anti-oil and antistatic outsole ideal for warehouse workers, transport and logistics personnel, carpenters, electricians and craftsmen in general.

And, of course, comfort and long lasting well-being are guaranteed by the WingTex air tunnel lining and the antibacterial and breathable U-Power Original insole in light polyurethane compound.

UPPER

Breathable nylon and scuff cap protection in anti-abrasion material

LINING

Wingtex® with breathable air tunnel

SAFETY TOE CAP

AirToe Aluminium

PIERCE-RESISTANCE

Save & Flex Air
